ZEBRA MIDGE
CHEAT SHEET

VENTURES FLY CO.

ZEBRA MIDGE

Why fish it?

- Catches fish year-round
- Simple and durable
- Sinks fast

WHAT DOES IT IMITATE?

The Zebra Midge is a **realistic**—fly that very closely matches a specific insect—nymph pattern.

It imitates a **midge pupa**, the in-between stage of a midge as it rises through the water to hatch into an adult.

To learn more about midges, watch this video!

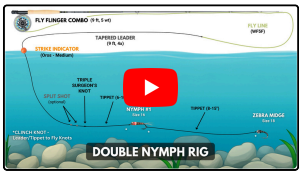

HOW TO FISH IT?

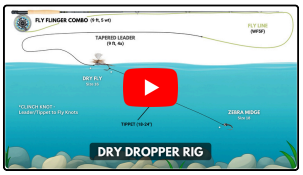

Our two favorite ways to fish the zebra midge are on a **double nymph** or **dry-dropper** rig.

Not sure how to set them up?

Click or tap either graphic to watch a quick step-by-step video.

Double Nymph Rig

Dry Dropper Rig

FAVORITE SIZES
